

Android Cloud Network Media Player & Android Cloud Network Media Player with Live Input

Simple Network Solution

No software installation is required once you have connected the Cloud Network Media Players to your screens. The screens in your network can all be under one roof or as part of a national or global network. Just by logging in to our cloud based CMS you can control your screens individually or as part of a network.

Integrated Android Media Player

The integrated Android Media Player allows for super fast updates. If required you can also run third party Digital Signage software via the Android PC board.

Commercial Grade
Designed for use in commercial applications this media player can run 24/7. There are no external buttons or controls to avoid tampering.

Cloud Based Digital Signage Software
Transform your screen into a remotely updateable advertising display with our Network Media Player. With our online CMS you can upload content, design multimedia layouts, create your own personalised playlists and schedules as you take control of your screen.

Broadcast Live TV
It couldn't be simpler to integrate live TV with Digital Signage with our specialised Media Player with Live Inputs. Simply connect a TV set-top box or desired input source into the media player via HDMI. Then connect the media player to a screen via HDMI and you can control everything via our CMS.

Touch CMS (go to page 65 for more information)

Our ground breaking new Touch Cloud Management System that puts you in control as you create, deploy and touch your very own content that you can send via your Android Cloud Media Player for your Touch Monitor in a matter of seconds.
